Oct 21-23, 2016, Wuhan

Welcome Letter

It is our great honor to welcome you to the Nature Conference on Viral Infection and Immune Response (VIIR), jointly hosted by Wuhan Institute of Virology, Chinese Academy of Sciences, Nature Microbiology, Chinese Society for Immunology and Committee on Virology, Chinese Society for Microbiology. The viral diseases have been a threat to human health, and the relevant studies have become one of the hotspots of life science. Infection and immunity are the fundamentals to understand both acute and chronic viral diseases. To understand viral immunopathogenesis is the key to counteract viral infection. The conference, bringing together leading international scientists to explore emerging themes in viral infections and immune dysregulation, and providing promising venues for immune interventions, will be held on Oct 21-23, 2016 in Wuhan, China. Nature Conference on Viral Infection and Immune Response, with 500 participants all around the world, will focus on 6 topics: epidemiology of emerging viral disease, persistent viral infection and immune dysregulation, viral pathogenesis, immune intervention and prevention of disease, innate antiviral immunity and induction of systemic adaptive immunity. We are confident that the conference will contribute greatly to the development of studies on viral infection and immune response, provide guidance on the immune intervention and remove barriers to international research collaboration. On behalf of the hosting organizations, we are pleased that you are welcomed to join us in Wuhan, China's historic and energetic city. We look forward to the engaging discussions, exchanges of ideas, and to the major outcomes of Nature Conference on Viral Infection and Immune Response.

Yours Sincerely,
VIIR Conference Secretariat

Important Days

Apr,2016	Deadline for
31	Early Registration
Jun,2016	Deadline for
10	Regular Registration
Aug,2016	Deadline for
31	Abstract Submission
Oct,2016	Deadline for
23	Onsite Registration

Submission Registration
Payment Hotel Reservation

Hosting Organizations

Wuhan Institute of Virology, CAS

Nature Microbiology

Chinese Society for Immunology

Committee on Virology, CSM
