6th EPS-QEOD EUROPHOTON CONFERENCE "Solid State, Fibre, and Waveguide Coherent Light Sources"

Neuchatel, Switzerland, 24-29 August 2014

[DOWNLOAD](#) the 1st announcement

This unique conference features the latest breakthroughs in the field of solid-state, fibre and waveguided light sources.

World-reknown researchers discuss the latest developments in the scientific community accompanied by Summer School sessions at the PhD student and postdoctoral level, and by informal breakout sessions for discussion and vendor display viewing. This conference will also feature a half-day special Symposium "Lasers for Biomedical Imaging and Sensing" where the prominent keynote and invited speakers will discuss state of the art and future visions of this fascinating field. The sixth in a row, the Europhoton conference has shown to be very popular among the scientists and engineers that have continued to place it on their calendars.

The conference will be held in the [University of Neuchâtel](#), in the Faculté des Lettres building.
