Agric. Econ. – Czech

J. Stávková, E. Maca

Analysis of a long-term development of some selected parameters of Czech agriculture

Agric. Econ. – Czech, 49 (2003): 461-468

The paper presents some partial data obtained in studies on basic indicators of the development of Czech agriculture within the time interval of 1980– 2001. The statistical analysis, carried out within a spatially defined territory, enabled to compare the average level and variability

of gross plant production, gross animal production and gross agricultural production (in fixed prices of the year 1989) during the period of transformation of the centrally planned economy to free market economy on the one hand, and to quantify their dynamics and structure on the other. Using the method of time series, the authors analyse absolute and
