摘要:

简单介绍了大气环境试验的发展历程,从不同技术角度出发,分别分析了大气环境试验的种类、应用、试验技术、试验站、信息技术、加速试验及标准化等7个方面的国内外发展现状和趋势。最后提出了几点建议。

关键词: 大气环境试验 大气监测 检测分析 加速试验 标准化;发展

### DEVELOPMENT OF NATURAL ATMOSPHERIC ENVIRONMENTAL TEST IN THE WORLD

Abstract:

In this paper, the developing process of atmospheric environment test was briefly introduced. From different technological points, the development status and trend of the seven aspects including test kinds, application, test technology, test sites, information technology, accelerated testing and standardization of natural environmental test were analyzed respectively at home and abroad. Finally, several suggestions were given.

Keywords: atmospheric environmental test atmospheric monitoring detection and analysis accelerated testing standardization development
