

2008年云南电网抗击冰灾继电保护技术措施

翟海燕, 赵明, 李本瑜, 程颖

摘要: 介绍了2008年冰灾引起线路频繁故障期间, 云南电网为保障继电保护正确动作, 在技术和管理上采取的行之有效的措施。通过这些措施的实施, 使继电保护正确动作率达到了100%

关键词: 冰灾; 继电保护; 技术措施

Technical Measures of Relay Protection of Yunnan Power System for Fighting Against Ice Disaster in 2008

ZHAI Hai-yan, ZHAO Ming, LI Ben-yu, CHENG Yin

**Abstract:** During the period time when transmission line faults occurred frequently in the 2008 ice disaster, several measure have been carried out to ensure relay protection correct operation in Yunnan Power Grid. Though implementing these measures proposed in this paper, relay protection's correct operation rate achieved 100%.

**Key words:** ice disaster; relay protection; technical measure
