## UK-China Network of Clean Energy Research

**The UK-China Network of Clean Energy Research** is sponsored by the UK EPSRC (Engineering Physics and Science Research Council) and includes investigators from the UK SUPERGEN (Sustainable Power Generation and Supply) consortia and leading scientists from Chinese institutions. The mission of the Network is to establish and develop links between the leading UK SUPERGEN and Chinese institutions in the general area of clean energy research for the promotion of research collaboration (joint research project and program), exchange of knowledge, best practice, training and expertise between UK and Chinese scientists and engineers.

Since it was launched in January 2007, the UK-China Network of Clean Energy Research has organized a series of exchange visits between Network members from the UK and China. It organized the 1st UK-China Workshop on SUPERGEN in October 2007 in Beijing, China jointly with the China EPRI (Electric Power Research Institute). The 2nd UK-China Workshop on SUPERGEN will be held in the UK in October 2008. The major event of the Network is a Energy Forum – the 1st International Conference on SUPERGEN to be held in April 2009 in Nanjing, China.

The Network has announced:

### The 1st International Conference on SUPERGEN

6 and 7 April 2009

Nanjing, China

**It is guaranteed through IET and IEEE that all papers presented in the conference will be indexed by EI database, IET Inspec and IEEE Xplore. Best papers will be selected and published on special issues of international and Chinese national journals (SCI and EI indexed)**
