***Welcome to a conference for a future sustainable development!
January 5 - 7, 2009 Hong Kong***

The organizing committee of ICAE'09 – International Conference on Applied Energy is pleased to invite you to participate in the ICAE to be held in January 2009 in Hong Kong.

ICAE'09 will provide an unique platform for worldwide scientists, industrialists and the governmental decision-makers to discuss the advances of the science and technology in applied energy as well as the energy-related policies.

The main objectives of the conference are as follows:

To gather experts in applied energy technology from academia and industries around the world, especially in the Asia-Pacific region; To form network of energy technology scientists to facilitate interdisciplinary research and collaboration among researchers in engineering, chemistry, physics and materials science; To strengthen connection between academia and industry to facilitate application of advanced energy technologies; To seek policy support from the government to develop and promote energy technologies.

Professor Dennis Y.C. Leung

ICAE'09 Chair
