IBM Journal of Research and Development Celebrates the 100th anniversary of IBM

To commemorate the 100th anniversary of IBM, this special issue offers a forward-looking collection of technical essays covering a variety of cutting-edge information technology methods and how the technology will change in the future.

Specific focus is placed on technology for healthcare, analytics, augmented reality, and social media. Areas covered: Speech recognition, self-organizing systems, quantum computing, technologies for exascale computing systems, determination of anomalies in information streams without predefined rules, and advances in cognitive process modeling

The Next-Generation IEEE Research Article is Here!

We're excited to present a dynamic new design that redefines how IEEE publications are displayed online. Beginning with this pilot launch, we will be presenting cutting-edge IEEE articles from select publications in an elegant, state of the art, HTML layout that provides a richer and more interactive research experience.

» Sneak Peek: [Experience the next-generation IEEE research articles today!](#)

Open the Door to Opportunity: Renew Your IEEE Membership

As a member of IEEE, you enjoy many benefits that can enhance your career and personal achievements, as well as save you money.
