综述

多通道盲反卷积算法综述

方标,黄高明,高俊

海军工程大学电子工程学院

摘要:

本文阐述了多通道盲反卷积 (Multichannel Blind Deconvolution-MBD) 的发展历程、基本模型及假设、数学原理以及通用求解过程, 讨论了目前MBD几个研究方向的发展现状与面临的问题。在分析了 MBD研究进展的基础上, 从时域、频域、时频域、子空间、子带技术及其他算法六个方面分类综述和比较了MBD典型算法的特点与方法思路, 说明了各类算法的优缺点以及主要问题。最后指出了目前多通道盲反卷积算法研究存在的不足, 并提出了MBD未来理论和应用研究中可继续深入的开放课题。

关键词: 卷积混叠; 盲反卷积; 多通道

A Review of Multichannel Blind Deconvolution Algorithm

FANG Biao, HUANG Gao-Ming, GAO Jun

College of Electronic Engineering, Naval University of Engineering, Wuhan

Abstract:

The history, basic model, hypothesis, mathematical principle, and general solutions of multichannel blind deconvolution (MBD) are described in this review. Then, the state of the art and the challenge problems in MBD research are discussed. On the basis of the latest process, the characteristic and methods of typical algorithms are summarized from the six aspects which are time domain, frequency domain, time-frequency domain, subspace, sub-band technology and other one. The major defects, advantages and disadvantages of these algorithms are proposed. Finally, the existing problems on the research of MBD are generalized, and the open areas of theoretic and applied research in MBD are brought forward.

Keywords: convulsive mixtures blind deconvolution multichannel
