ICT and cooperative work

**Agric. Econ. — Czech, 51
474**

This article deals with the possibilities of making use of Information and communication technology (ICT) among teams. There are two main approaches: intranet technologies (intranets), and specialised web technologies dedicated to cooperation (these systems are dedicated to cooperation). Web technologies are the main element of the most important technology in the present business information systems. The web environment currently used applications. Its integration with the users locally independent and enables them
