## Welcome to IEEE ISPLC 2014!

The 18th IEEE International Symposium on Power Line Communications and its Applications (ISPLC) will provide a unique ideas, recent results, and share experiences among researchers and practitioners in the field of communication over power lines. We cordially invite you to participate in the eighteenth edition of this symposium, which will be held in Glasgow, Scotland.

The technical programme comprises of three keynote speakers --- Stephen McLaughlin (Heriot-Watt University; impulse noise in power lines) and Graham Dudgeon (Mathworks, model-based design for power line communications) --- an expert panel, and 60 technical papers organised in 16 sessions, which describe research work, experimental efforts, practical experiences, and industrial and commercial developments in all aspects power line communications.

Please find all relevant information on these pages. In case you have any queries, please feel free to contact the conference secretariat.

Important information for participants / presenters: please check UK Visa requirement, as outline in the travel section.
