About the conference

Rapid development in the area of wireless communications and signal processing in recent years has led to unprecedented growth in the number of people using these technologies and also the interest in research and development. The 2009 International Conference on Wireless Communications and Signal Processing (WCSP 2009) is the premier forum for the presentation of new advances and research results in the fields of theoretical, experimental, and applied wireless communications and signal Processing. The conference aims to bring together leading researchers, scientists, engineers and scholar students in the domain of interest from around the world to exchange and share their experiences, new ideas and results in challenges encountered and solutions adopted. The conference venue is located in Nanjing, China. All accepted papers will be included in IEEE Xplore and can be indexed in EI.
