The 8th International Conference on Optical Communications and Networks (ICOCN 2009) invites high-quality recent research results in the areas of optical devices, components, communications, transmission, network architectures, protocols, design, management and operation. The main goal of the conference is to bring together academics, scientists, professionals, engineers and industrialists who work in the field of optical communications and networks and to foster the exchange of information, ideas and experiences among them in this fast-moving and exciting field. ICOCN has been held annually in Asia-Pacific region since 2002. We look forward to your participation to make this conference a success. All short courses are arranged on 14 September 2009.

For a paper to qualify for the Best Student Paper Award, a student must be the first author and the presenter of the oral or poster presentation.
