

2010 International Conference on System science, Engineering design and Manufacturing informatization

12-14, NOVEMBER, 2010, YICHANG, CHINA
ICSEM 2010

Sponsored by
Guizhou University, China

Technical Co-sponsored by
IEEE Chengdu Section
Aurel Vlaicu University of Arad, Romania
International Association of Management Science and Industrial Engineering

Welcome to ICSEM 2010!

News: *ICSEM 2010 has been included in [IEEE Conference search](#). (2010-02-15)*

On behalf of the Scientific and Organizing Committees it is our great pleasure to invite you, together with accompanying persons, to attend the 2010 International Conference on system science, engineering design and manufacturing informatization (1st ICSEM 2010), 12-14, November, 2010, Yichang (China).

The 2010 international conference on system science, engineering design and manufacturing informatization provides three days' focus on the system science, engineering design and manufacturing informatization technology that are the basis for the information and manufacture. The theme of the plenary session is "system science, engineering design and manufacturing informatization" featuring invited speakers who will further explore this topic that is so significant in these fields. Concurrent sessions and a poster session will cover a wide range of topics and issues, including both contributed papers and special sessions developed on specific themes, all with a central focus of system science, engineering design and manufacturing informatization. Topics will range from the theories to the practice methods and technology, such as complex system modeling and complexity, control theory, Industrial design, cybernetics, Modeling and simulation methods, e-commerce and computer-aided Manufacturing etc.

This conference provides an idea-exchange and discussion platform for the world enterprises and academia, where internationally recognized researches and practitioners share cutting-edge information, address the hottest issue in system science, engineering design and manufacturing informatization, explore new technologies, exchange and build upon ideas.

We do believe that there is still a need for a specialized international meeting in the field of system science, engineering design and manufacturing informatization, and the 1st ICSEM is just the adequate forum for it. We expect that also this conference will bring together many specialists of system science, engineering design and manufacturing informatization from international scientific and engineering community.

Please join us at the conference, meet many specialists in the field, and enjoy the beauty of winter at the center of China.

We look forward to seeing old friends and meeting new ones.
