

Turning innovation into value

The European branch of Xerox global research, Xerox Research Centre Europe is a multidisciplinary organisation with experts in computer science, natural language processing and machine learning applied to information, data and documents. We design technology with the knowledge gathered by our work practice specialists to create innovative business processes, document services and solutions. XRCE is set in the heart of the French Alps near Grenoble.

News

ARC6 – day, July 9th, 2014; Grenoble, France

The [ARC6-day](#) is a knowledge-sharing event. For a day various industrial and academic research teams meet together and discuss different scientific and industrial challenges, needs, interest and expertise covering issues like micro-electronics, vehicle-based systems, web and big data and data visualisation.

[Chris Dance](#) will participate and give a talk on analytics. Chris is a research fellow at Xerox and the data analytics competency champion for the Xerox Innovation Group.

TALN 2014, July 1-4, 2014; Marseille, France

TALN: 'Traitement Automatique du Langage Naturel' conference (francophone conference on automatic natural language processing)

[Claude Roux](#) , XRCE Parsing & Semantics research group, will present a paper co-authored with Caroline Brun on sentiment mining of tweets: Décomposition des « hash tags » pour l'amélioration de la classification en polarité des « tweets ».
