The 4th International Symposium on Intelligence Computation and Applications (ISICA 2009) will be held on October 23-25, 2009, in Huangshi, China. ISICA 2009 will present current progress of theories and methodologies in the field of computational intelligence and their applications.

The accepted papers will be included in the two volumes of the proceedings that will be published by Springer, including one volume in Lecture Notes in Computer Science (LNCS), and the other volume in Communications in Computer and Information Science (CCIS). The proceedings of last three ISICA events have been indexed by EI, and/or ISTP. Information about the two volumes can be found on Springer's LNCS webpage [www.springer.com/lncs](http://www.springer.com/lncs). The new series CCIS is run by Springer in parallel to LNCS, using the same resources, the same workflow, the same templates and style files. Volumes published in CCIS are sent to the same indexing and abstracting services like LNCS.

To promote the international communication, the conference provides free accommodation for international participants outside china, and also offers limited number of registration fee waivers.

---

### Keynote Speakers:

[Prof. H.R.Tizhoosh](#), University of Waterloo,CA

[Prof. Erik D. Goodman](#) , Michigan State University, USA

[Prof. Massimiliano Vasile](#), University of Glasgow, UK

---
