AFNLP

The Asian Federation of Natural Language Processing (AFNLP) associations is to promote information dissemination and research co-operation among researchers in the region and co-ordinate initiatives of the region with those of the other regions in Natural Language Processing and the related fields.

The official members of the AFNLP are either professional associations or research institutions/universities in countries or territories of the region, which represent researchers in the countries/territories or which take on the responsibility of representing them. We also welcome other organizations, such as organizers of conferences in the region, international professional bodies, professional associations of research fields related with NLP etc., to join us as liaison members.
