CIKM 2009 (ACM 18th Conference on Information and Knowledge
Management) will be held on November 2-6, 2009, Hong Kong.
Since 1992, CIKM has successfully brought together leading
researchers and developers from the database, information
retrieval, and knowledge management communities. The purpose of
the conference is to identify challenging problems facing the
development of future knowledge and information systems, and to
shape future research directions through the publication of high
quality, applied and theoretical research findings.

In CIKM 2009, we will continue the tradition of promoting
collaboration among multiple areas. We encourage submissions of
high quality papers on all topics in the general areas of databases,
information retrieval, and knowledge management.
