

IEEE ICBK 2017:

The 8th IEEE International Conference on Big

August 9 -10, 2017

Hefei, China

Big Knowledge deals with fragmented knowledge from heterogeneous, autonomous information sources for complex and evolving relationships, in an international forum for presentation of original research results in Big Knowledge opportunities and challenges, as well as exchange and dissemination including algorithms, software, systems, and applications. ICBK draws researchers and application developers from a wide range of Big Knowledge research including high performance computing, World Wide Web, and big data analytics. By promoting novel, high quality research findings, and innovative solutions to complex Big Knowledge.

Accepted papers will be published in the conference proceedings by the *IEEE Computer Society*. Awards will be conferred at the conference on the basis of the possible inclusion, in an expanded and revised form, in the *Knowledge and Information Systems Journal*.
