WELCOME

The Second IFIP/IEEE International Workshop on Analytics for Network and Service Management (AnNet 2017) will be held in conjunction with the IFIP/IEEE International Symposium on Integrated Network Management (IM 2017) in Lisbon, Portugal, May 8-12, 2017.
Following the success of the first edition of this workshop, the main goal of AnNet is to present research and experience results in the area of data analytics and machine learning for network and service management. Approaches such as statistical analysis, data mining, and machine learning are promising mechanisms to harness the immense stream of operational data and to improve operations and management of IT systems and networks.
AnNet 2017 will include original full-papers presentations, a keynote, and short-paper sessions. The workshop attendees will be stimulated to participate in interesting discussions. To this end, short papers describing late-breaking advances and work-in-progress reports from ongoing research and experimental work are also welcome.

IMPORTANT DATES

Paper Registration: ~~December 15, 2016~~ **January 24, 2017**

Paper Submission Deadline: ~~December 19, 2016~~ **January 24, 2017**

Acceptance Notification: ~~January 30, 2017~~ **February 10, 2017**

Camera-Ready Papers: **February 15, 2017**

Workshop Date: **May 8, 2017**

NEWS

AnNet 2017 was a great success, thank you all for attending!
