About HSI2017

MORE>>

The 10th International Conference on Human System Interaction (HSI2017) will be held in Ulsan, Republic of Korea, from July 17th to 19th, 2017. The conference offers an unique and interesting platform for scientists, engineers and practitioners throughout the world to present and share their recent research and innovative ideas in the interactions between human and systems. Rapid changes in information technologies have lead to a boost in the strength and efficiency of human activity. These technologies have an influence on every area of human life, including education, science, business, leisure time, entertainment, government, and health care. Human life is greatly dependent on these systems efficiency and performance. The HSI conference has been prepared as a platform for exchanging ideas, knowledge, skills and experiences in interactions between man and these systems. The HSI conference series has become one of the most important international conferences in the field of human system interactions, human system science and engineering, human factors in large complex systems, human space computing and cyberphysical systems, human environment interactions, and social technical systems.
