Abstract: Several well-known cases of top of the line corrosion(TLC) in wet natural gas pipelines was reviewed in this paper. The review covered influence factors, corrosion protection techniques and research developments about top of the line corrosion. Little research work has been done about top of the line corrosion in wet natural gas pipelines in China and the reason was discussed in detail. Some suggestion about top of the line corrosion mechanism and corrosion protection techniques was made in the paper.

Keywords: wet natural gas pipeline top of the line corrosion influence factor corrosion protection technique flow regime
