Welcome to the TANDEC web site

TANDEC will be recognized worldwide as a leading applications development facility for melt processing nonwovens. TANDEC will encourage relationships between academics and industry to provide leadership in research, education, and industry services, fostering new developments in melt processed nonwovens. TANDEC operates a 500 mm Reifenhäuser melt blowing pilot line with bicomponent fiber technology.

TANDEC is committed to protecting the proprietary and confidential information of its clients. Each client's research and pilot line trials are treated discretely and independently at TANDEC, and the entire TANDEC staff is sensitive to the absolute boundaries of information flow.
