CORESTA-FAPAS
Proficiency Testing for Detection of Transgenic Tobacco
2014

March 16, 2014

Dear Colleagues,

We are organizing with the FAPAS the next round of the CORESTA Proficiency Testing for Detection of Transgenic Tobacco in June-July 2014. This testing will use a novel GMT material produced in 2013 and a low cost to participate will be offered (approximately 350€). This test will be qualitative and quantitative (participants are free to choose).

Your participation is needed to give a guarantee to the supply chain.

In order to perform this round of testing as scheduled, we would ask you to confirm your participation. We also need to have your answers even if you can't join us.

We will organize a meeting to discuss the outcome of this testing during the next CORESTA Congress in Québec, Canada in October 2014.

Kind regards,

François Dorthac de Borne (Coordinator of the Sub-group),
Masahiro Miyoshi (Secretary, Organizer of the test)

近日，贵州省烟科院烟草基因检测分析中心首次参加了由Coresta和国际权威认证机构FAPAS组织的2014年国际转基因烟草检测能力验证计划，此次计划全球有12家和5家实验室分别参加了定性和定量评价。权威评估报告显示，贵州院的定性和定量测试皆顺利通过检测认证，成绩优异。充分表明，贵州烟草院已具备与国际接轨的高水平转基因烟草检测能力。
