

Types and Characteristics of Performing Concretes Used in the Constructions Processes Engineering

Author(s): Vladimir Corobceanu • Răzvan Giușcă

Tomme: LI (LV) | **Fascicle:** 1-2 | 2005

Pages: 75-80

Abstract text:

The light concrete industry has a great development at present, due to some technical characteristics that make them highly appreciated. These characteristics are: the reduced apparent density, the capacity of high thermal insulation and high resistance at fire, compared to heavy concretes. These features have a result a type concrete elements (simple, reinforced or prestressed) with reduced weight, which are good thermo-insulators and easy to manufacture, etc.
