ABOUT ASIAN SYMPOSIUM ON POLYMERS IN CONCRETE

Asian Symposium on Polymers in Concrete (ASPIC) is the successive regional international symposium supported by Board of International Conference on Polymers in Concrete (ICPIC). The first symposium was named as East Asian Symposium on Polymers in Concrete (1st ESPIC) and was held in Chuncheon (Korea) in 1994. The second symposium (2nd ESPIC) was held in Koriyama (Japan) in 1997. Since 2000, the third symposium was renamed to Asian Symposium on Polymers in Concrete (ASPIC) and held in Shanghai (China).

The main goals of ASPIC are providing a common platform for the scientists and engineers to change their aspects and experiences in the area of polymer-concrete composites and promoting the application of the polymer-concrete composites in the Asian countries.

The Asian Symposium on Polymers in Concrete (ASPIC) was got a great deal of responses. It was held every three years in an Asian country.

Previous ASPIC:

1994, Chuncheon, Korea

1997, Koriyama, Japan

2000, Shanghai, China

2003, Chuncheon, Korea

2006, Chennai, India
