Brief Introduction of Traffic Impact Study

KYLE K. LIANG

(Department of Public Works and Transportation, Maryland, 12116, United States)

Abstract: The purpose of a Traffic Impact Study (TIS), prepared for submittal to concerned department of government, is to review impacts of the proposed development on the road network system. The evaluation should consider traffic capacity, signalization and safety issues. This report will be used to determine the needed improvements in the vicinity of the site access and provide data to the State on what off-site improvements need to be considered. The primary task of this paper is to introduce the contents and methods of TIS in the Maryland State Highway Administration (SHA) and Montgomery County Department of Public Works and Transportation (DPWT).

Keywords: U.S.; traffic impact study; required datum
