摘要 探讨了执行机构在“有效资源永不放弃”原则下所采用的功能重构方法。采用伪逆法针对飞控系统操纵面损坏故障进行了功能重构研究,通过仿真证明该重构方法的有效性。

关键词: 功能重构 伪逆法 飞控系统

Abstract: This paper provides a function reconfiguration method. Under the rule of "effective source never give up", this paper proposes a function reconfiguration method for actuators. The pseudo inverse method is applied to investigate the function reconfiguration for the rudder fault mode of a flight control system. The simulation results indicate that the method is effective.

Keywords: function reconfiguration pseudo-inverse method flight control systems
