摘要 在防空导弹武器系统的作战布局优化中使用模拟退火算法, 选取适当的 Boltzmann 常数, 结合基于随机服务系统理论的作战效能分析数学模型, 得到了较为快捷的定量优化武器系统作战布局的方法。

关键词: 导弹武器系统 效能分析 模拟退火算法 作战布局

Abstract: The simulated annealing algorithm is used to optimize combat configuration of air defense missile weapon systems. By choosing Boltzmann constant adequately, and combining with a mathematical model based on stochastic service system theory to analyze combat effectiveness, the shortcut to solve quantitatively the problem about optimization of a weapon system's combat configuration is presented.

Keywords: missile weapon system effectivenes analysis simulated annealing algorithm combat configuration
