**摘要** 阐述了构造非实时软件运行剖面的方法,以及根据运行剖面生成非实时软件可靠性测试数据的方法,并提出了构造实时软件运行剖面和生成实时软件可靠性测试数据的思路。最后给出实例,系统地演示非实时软件可靠性测试数据的生成过程

**关键词:** 软件可靠性测试 系统模式剖面 功能剖面 运行剖面 测试数据 (非)实时软件

**Abstract:** The method of constructing the operational profile based on which the reliability test data are generated for non real time software is discussed. Also the idea of those for real time software is proposed. An example illustrating the whole procedure of generating non real time software reliability test data systematically is given at the end of this paper.

**Keywords:** software reliability testing system mode profile functional profile operational profile test data (non) real-time software
