Journal of Hazardous Materials

Environmental Control, Risk Assessment, Impact and Management

The *Journal of Hazardous Materials* publishes full length research papers, reviews, and case studies which improve our understanding of the **hazards** and **risks** certain **materials** pose to people and the environment or deal with ways of controlling these hazards and associated risks. The [Editors](#) particularly welcome proposals for review articles. To limit the Scope the following areas are excluded: non-hazardous materials, work place health & safety, standard municipal and wastewater treatment processes including nutrient removal, greenhouse gas mitigation, and the manufacturing of explosives.

The Journal publishes high-impact contributions on:

- Characterization of the harmful effects of **chemicals** and materials
- Measurement and Monitoring of **Hazardous Materials**
- Transport and Fate of HM in Environment
- Risk Assessment and Management

[Guide for
Authors](#)[Submit Your

- Physico-chemical and Separation Processes
 - Adsorption
 - Ion Exchange
 - Coagulation/Flocculation/ Precipitation
 - Membrane Processes
 - Flotation
 - Stabilization/Solidification
- Biological Processes
 - Biodegradation
 - Phytoremediation
- Advanced Oxidation Processes
 - Photodegradation/Photocatalysis
 - H_2O_2
 - Fenton
 - Ozone
 - Sonolysis
 - Plasma Processes
- Safer and Cleaner Technologies

The Journal publishes papers with significant novelty and scientific impact. The Editors reserve the right to decline, without external review, papers that do not meet these criteria, including papers that:

- Are very similar to previous publications, with changed target substrates, employed materials, analyzed sites or experimental methods,
- Deal with parameter optimization of known processes without new concepts and/or interpretations,
- Report the environmental analysis and monitoring of specific geographic areas without presenting new insights and/or hypothesis testing, or
- Do not focus on the environmental relevance and significance of the studied systems or materials.
