 预防优先——德国工伤保险之灵魂 (邱明月) P78
 国外化学品安全监管简介 (董维武 慕磊) P80

英文目录:

P14 Causes of March 29 Accident of Liquid Chlorine Leakage Are Identified
 Based on the identification of experts, the accident of liquid chlorine leakage which happened in Huai'an Section of Beijing-Shanghai Expressway, on March 29, is a serious negligent accident of liquid chlorine leakage caused by a traffic accident. The causes involve using obsolete tires and serious overload, etc..

P14 Coverage of Industrial Injury Insurance Would Reach 75 Million People in 2005
 From the implementation of Rules of Industrial Injury Insurance to the end of 2004, the number of nationwide policy holders of the industrial injury insurance has reached 68.45 million people. The number is expected to exceed 75 million people in 2005, and the emphasis of policy holders will be focused on the high-risk enterprises including mining, construction and the migrant peasant-workers etc.. This year, the objective of the industrial injury insurance development is put into the national economic and social development plan for the first time.

P14 Mr. Li Yizhong Emphasized the promotion of the "Five Elements" of Safety
 On April 5, Mr. Li Yizhong, Director of State Administration of Work Safety, said that continuous efforts must be made to promote the "five elements" of work safety available, and establish a long-term effective system on work safety. Efforts should be made according to the guideline of "safety first, prevention first, strengthening main body and comprehensive control on both superficial and fundamental problems". In order to promote the "five elements" of work safety available, it would be done the following works. First, strengthening development of safety culture, enhancing the whole nation's awareness of safety and improving their safety quality; Secondly, improving safety-related legal system and standardizing the safety behavior of the whole society according to law; Thirdly, strengthening safety responsibility concept and establishing strict work safety responsibility and accountability system; Fourthly, improving more progress in safety science and technology, implementing the strategy of "improving work safety with science and technology" and solving the significant scientific and technical problems which affect work safety; Fifthly, increasing input in work safety,

establishing the mechanism of joint input from state, local governments and enterprises.

P15 Compensation of No Less Than RMB 200,000 for the People Died in Mine Disaster

The leaders of SAWS clearly endorsed the practice in some provinces that the compensation standard for the people died in coal mine accidents will be not less than RMB200,000. Mr. Li Yizhong said that the compensation is stated clearly in Work Safety Law and relevant regulations, but there are no specific compensation standards in relevant laws and regulations. At the beginning of last year, the Decision of the State Council on Further Strengthening Work Safety pointed out that we must not only improving the compensation standards, but also increase the compensation amount, it embodies the requirements for people orientation and safeguarding workers' lawful rights and interests. Increasing amount of compensation means the increasing cost of accident, this can make the mine owners and managers feel that it is better to control the hidden dangers and risks than to make compensation.

P16 Shanxi: 11 Mines "Lost" Their License

Shanxi Provincial Coal Industry Bureau recently issued a public notice that it will revoked 11 mines' production license because accidents with the death of over 3 persons had happened in these mines. These 11 mines included Xishui Coal Mine in Pinglu District, Shuozhou, where an extremely serious gas explosion happened on March 19 this year and caused 72 deaths. In addition, pit No.2 of Xiangyuangou Coal Mine in Jiaocheng, Lvliang, where an accident happened on March 9 this year and caused 28 deaths, were deprived of the qualification for capital construction of coal mines.

P30 The 80th Anniversary of the All China Federation of Trade Unions

For 80 years, as the representation and protector of the workers' rights and interests, the All China Federation of Trade Unions has always regarded protection of the workers' safety and health in the production process as an important component of their responsibility and has always been an indispensable power to promote enterprise work safety.

P74 The 10th International Conference on Occupational Respiratory Diseases, ICORD Held in Beijing

P74 World day for Safety and Health at Work: 28 April 2005

2005: CREATING AND SUSTAINING A PREVENTATIVE SAFETY AND HEALTH CULTURE

Cover Page:
