The Fifth International Conference on Information Assurance and Security

News: Paper submission deadline is extended to Mar.22.

Information assurance and security has become an important research issue in the networked and distributed information sharing environments. Finding effective ways to protect information systems, networks and sensitive data within the critical information infrastructure is challenging even with the most advanced technology and trained professionals.

The International Conference on Information Assurance and Security (IAS) aims to bring together researchers, practitioners, developers, and policy makers involved in multiple disciplines of information security and assurance to exchange ideas and to learn the latest development in this important field.

The topics include but are not limited to:

Information Assurance, Security Mechanisms, Methodologies and Models

- Authentication and Identity
- Management Authorization and Access Control
- Trust Negotiation, Establishment and Management
- Anonymity and User Privacy
- Data Integrity and Privacy
- Network Security
- Operating System Security
- Database Security
- Intrusion Detection

- Security Attacks
- Security Oriented System Design
- Security and Performance trade-off
- Security Management and Strategy
- Security Verification, Evaluations and Measurements
- Secure Software Technologies
- New Ideas and Paradigms for Security
- Cryptography
- Cryptographic Protocols
- Key Management and Recovery

Secure System Architectures and Security Application

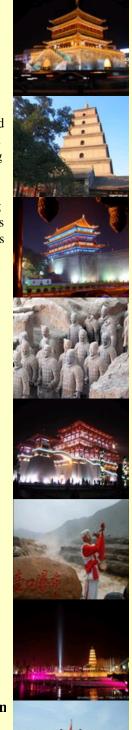

- Web Services Security
- GRID Security
- Ubiquitous Computing Security
- Mobile Agent Security
- Internet Security
- Intellectual Property Protection
- E-Commerce Security

- E-Government Security
- E-Health Security
- Home System Security
- Sensor Network Security
- Ad hoc network security
- Biometrics Security and Applications
- Secure Hardware and Smartcards

Image Engineering, Multimedia Signal Processing and Communication Security

- Multimedia Security
- Multimedia Forensic
- Digital Watermarking and DRM
- Communication Security
- Biometrics
- Information Fusion
- Image Registration
- Image Mosaic

- Image Indexing and Retrieval
- Image and Video Coding
- Multiscale Geometric Analysis
- Motion Detection and Tracing
- Feature Extraction
- 3G Communication
- Embedded System Design

Publication :

The conference proceedings will be published by IEEE Computer Society and will be indexed by EI and ISTP.

Important Dates

Deadline for workshop proposal: Feb. 20, 2009

Deadline for submission of full papers: Mar. 01, 2009 Mar.22, 2009
Acceptance notification: Apr. 01, 2009 Apr.10, 2009

Final camera-ready papers due: May.01, 2009
