Aims and scope

Molecular Plant is dedicated to serving the plant science community by publishing novel and exciting findings with high significance in plant biology. The journal focuses broadly on cellular biology, physiology, biochemistry, molecular biology, genetics, development, plant-microbe interaction, genomics, bioinformatics, and molecular evolution.

Molecular Plant publishes original research articles, reviews, Correspondence, and Spotlights on the most important developments in plant biology. Please see our [information for authors](#) for details. Other categories of papers, such as perspectives and meeting reports, can also be considered.
