# Vision Statement

- To create research based seed industry, that is dynamic, innovative and highly competitive both regionally and internationally and is capable of producing high performance, high quality seeds and planting materials for the benefit of farmers, thereby contributing to sustainable growth of agriculture in Pakistan.
- To modernize Agriculture practices in Pakistan through responsible use of biotechnology to improve the lives of farmers.
- To promote private public partnership especially in crop biotechnology.
- To strive to establish a transparent, fair and equitable regulatory system for the Seed Industry through sustained dialogue with Government Authorities.
- To contribute valuable inputs for policy makers.

# Mission Statement

The growing seed industry in private sector realizing their role and fighting the hindrance/ competition with public sector has finally gathered on one platform and is now represented by “Seed Association of Pakistan (SAP)”.
