International Conference on Soil Fertility and Soil Productivity, Two Features to be Distinguished

- Differences of Efficiency of Soils for Land Uses, Expenditures and Returns -

DATE: March 17 – 20, 2010

LOCATION: Humboldt Universitaet, Berlin, Germany

ORGANIZED by:

- International Union of Soil Science (IUSS), Division 3 –Soil Use and Management, together with
- German Soil Science Society, Commission 4 – Soil Fertility and Plant Nutrition
- German Society of Plant Nutrition
- German Crop Science Society
- Working Group IOSDV - International Organic Nitrogen Fertilizing Trials

SPONSORED by

- ECSSS – European Council of Soil Science Societies
- ESSC –European Society for Soil Conservation

CONFERENCE TOPICS will be to characterize and discuss

- (1) The concepts of “soil fertility” and “soil productivity”, contents, chances, limitations and contradictions
- (2) The soil quality concept, and indicators with respect to soil fertility and soil productivity
- (3) The soil properties for soil fertility, and for use of soil services,
- (4) The soil properties for soil productivity and soil investments based services
- (5) Limitations of the concepts of soil fertility and soil productivity
- (6) Short time investments for use of soil productivity
- (7) Soil conservation measures to maintain and improve soil fertility and productivity
- (8) Modelling soil fertility and soil productivity
- (9) Soil changes and impacts by shift from the soil fertility concept to the soil productivity concept
- (10) Soil management, and policy requirements with respect to soil fertility and soil productivity
- (11) Future perspectives for the importance of soil fertility or soil productivity with respect to different domains of soil use
- (12) Others about the thematic soil fertility-productivity
