## Acta Medica Iranica

2009;47(4) : 23-30

### STUDIES OF TESTOSTERONE LEVEL IN SIX POPULATIONS OF IRAN

S.Y. Seyedna ; M. Sheidai

#### Abstract:

Testosterone level was determined in six different populations of Iran using saliva steroid assay. Significant difference was observed in morning and afternoon testosterone level of the same individual ( $P>0.001$ ) significant difference was also noticed among different regions studied ( $P>0.001$ ). Comparisons between alcoholics and nonalcoholic as well as smokers and nonsmokers showed significant difference in most of the cases.
