## Welcome...

Welcome to the website for the Charles F. and Joanne Knight Alzheimer's Disease Research Center (Knight ADRC), in the [Department of Neurology](#), at [Washington University School of Medicine](#) in St. Louis, Missouri, USA. The Washington University Knight ADRC is one of [28 centers](#) funded or otherwise supported by the [National Institute on Aging](#) with the collective aim of facilitating advanced research on clinical, genetic, neuropathological, neuroanatomical, biomedical, psychosocial, and neuropsychological aspects of Alzheimer's disease and related brain disorders. Our Center and its clinical research arm - the [Memory and Aging Project](#) along with the [Memory and Aging Project Satellite](#) (MAPS) - are at the forefront of a worldwide effort to uncover key causal factors in the development of Alzheimer's disease, with a goal of developing more effective treatments and an eventual cure.

For patient clinical care please visit the website for the [Memory Diagnostic Center](#).
