## Acta Medica Iranica

2009;47(4) : 41-48

### PRIOTIES IN MALARIA FIELD RESEARCH

Nadim, A.M.D.

#### Abstract:

After mentioning the main differences between malaria control and malaria eradication, it is suggested that all anti-malaria activities in Iran should be renamed as malaria control. Applied research in malaria is identified into four categories covering the following subjects. 1- Malaria parasites and anti-malaria drugs. 2- Malaria vectors. 3- Malaria in the community. 4- Use of epidemiological techniques in malaria field research. Various research programs that at present could or should be carried out in each category have been discussed in the text.
