THIS MONTH:

- ▶ [Brain Volume Loss in Cannabis-Using Schizophrenia Patients](#)
Patients with recent-onset schizophrenia who used cannabis during 5 years of follow-up lost more gray matter volume than patients who did not use cannabis. [READ MORE](#) ▶
- ▶ [Revisiting Schizophrenia Candidate Genes](#)
Systematic testing of 648 variants in 14 genes did not confirm the relationships to schizophrenia shown in previous smaller studies. [READ MORE](#) ▶
- ▶ [Adjunctive Group Training for Borderline Personality Disorder](#)
Borderline personality disorder patients who received standard treatment plus a group program with cognitive-behavioral, skills training, and systems components experienced greater improvement than those who received standard treatment alone. [READ MORE](#) ▶
