中文摘要:医院集中监测是中药注射剂不良反应(adverse drug reaction, ADR)监测的重要方法。目前,由于医务人员重视不足、研究人员专业知识匮乏、ADR上报系统不健全、组织结构不合理等原因,使中药注射剂医院集中监测难以正常进行。通过强调中药注射剂ADR监测的重要性,建立健全管理机制,加强人员培训,建立四级检查制度,实施条形码监测系统等手段,建立中药注射剂医院集中监测质量控制体系,旨在加强中药注射剂安全性监管工作,保障用药安全。

Discussion on establishment of quality control system for intensive hospital monitoring on traditional Chinese medicine injections

Abstract:Hospital centralized monitoring is an important method to adverse drug reaction(ADR) of traditional Chinese medicine(TCM) injection. Nowadays, our hospital centralized monitoring to TCM injection is difficult to carry out normally, because of little attention that the medical staffs pay to, poor professional knowledge of researchers, unsound reporting system, unreasonable organization structures of ADR and so on. We hope to establish a quality control system of hospital centralized monitoring to TCM injection, by means of emphasizing the importance of ADR monitoring to TCM injection, establishing and perfecting the management mechanism, strengthening staff member training, building the four-steps inspecting rule, implementing barcode monitoring, to strengthen safety supervision of TCM injection, guarantee medication safety.
