Abstract: Objective: This study aims to explore the curative effect and side reaction of Jinlong capsule combined with chemotherapy for liver metastases of gastric cancer. Methods: A total of 37 cases of gastric cancer patients with liver metastases under went the "TF" scheme chemotherapy, including: TXT60 mg/m², iv 1h, d1; CF - Ca: 200 mg/m², ivgtt 2 h, d1~ d2, 5-Fu: 400 mg/m², iv, d1 ~ d2, or 5-Fu: 600 g/m², civ 22 h, d1 ~ d2. The cycle of the chemotherapy was 21 days was given for 3 cycles. From the first cycle of chemotherapy, Jinlong capsule (4 grains) was started to be taken by patients three times a day. The curative effect was evaluated at 4 weeks after the completion of che-motherapy. Results: The total effective rate (CR + PR) was 59 .5%. In the survival patients, the quality of life was improved, and the adverse reaction of chemotherapy was reduced. Conclusion: Jinlong capsule combined with chemotherapy for liver metastases of gastric cancer can improve the curative effect, reduce the chemotherapy reaction, and improve the quality of life.
