## Education and Training

B.S. Biology Virginia Tech. Blacksburg, Virginia

M.D. University of Maryland School of Medicine Baltimore, Maryland

Residency Department of Family Medicine University of Maryland School of Medicine Baltimore, Maryland

## Biosketch

I have been involved in the care of HIV infected individuals at the University of Maryland for the past two decades in both direct patient care and research venues. I have personally treated hundreds of individuals and acted as a PI or Co- PI on numerous studies involving HIV infected patients. I have been certified through the American Academy of HIV Medicine and acted as an educator in the various aspects of care of HIV infected patients from students in the undergraduate level thru Community Attending physicians.

Previous and current research include studies into tobacco related pathology in HIV infected patients including women. In addition I have performed research on the effects of HPV related disease in the HIV infection patient population. These studies have involved both laboratory, epidemiologic, and interventional clinical components.

I have taught numerous courses on viral related pathologies and currently I am working on expanding care of Hepatitis C infected individuals the primary care.
