摘要:

从新疆藁本根茎提取物中,发现3种有降酶活性的类似结构的化合物,为进一步研究其构效关系,本文报道其中14个未 ▶把本文推荐给朋友 见文献报道的类似物的合成。

关键词: 新疆藁本 构效关系 降转氨酶活性 抗肿瘤活性

SYNTHESIS OF ANALOGUES OF CONISELIN, A HEPATOPROTECTIVE CONSTITUENT ISOLATED FROM CONISELIUM VAGINATUM THELL

PYDing and DQYu

Abstract:

Three compounds with high hepatoprotective activity were isolated from thealcoholic extracts of Coniselium vaginatum Thell. The relationships between structures and activitieswere studied, and fourteen analogues of them were synthesized. The structures of these synthetic preducts were characterized by elemental analysis, ¹HNMR, IR and MS. Pharmacological testsshowed four of them to have some antitumour activity. Hepatoprotective activity is to be tested.

Keywords: Relationship between structures and activities Heptoprotective activity Antitumour activity Coniselium vaginatum Thell
