Ras信号转导途径与肿瘤发生和生长密切相关,针对此信号通路重要靶点的药物设计是当前抗肿瘤药物研究的热点。本文综述了Ras蛋白及与其上下游信号转导途径相关的靶点及其抑制剂的研究现状,为新型抗肿瘤药物的研 设计提供参考依据。		服务与反

Abstract:		
Ras signaling pathway is closely related to the formation and growth of tumor. Currently, targeting on this signaling pathway is a hot research point for the design and development of anticancer drugs. In this paper, Ras protein as well as its related targets and inhibitors in signaling pathway were reviewed. It is expected to give research-related reference materials for the design of new anticancer drugs.		▶ 抗肿瘤药物 本文作者相美
