**摘要:**

为建立球花石斛的DNA分子标记鉴别方法,本文根据测定及GenBank上登录的109种共计164个石斛样本的rDNA ITS序列,设计了特异性鉴别引物QH-JB1 和QH-JB2,并对球花石斛进行了位点特异性PCR鉴别研究。结果表明,当复性条件为63.5 ℃, 1 min时,只有球花石斛的模板DNA能被扩增出约300 bp的阳性扩增带,而其他种石斛均为阴性。证明用本法鉴别球花石斛简便、省时,也适用于干燥球花石斛药材的鉴别,具有广泛的应用前景。

**关键词:** 球花石斛 石斛 位点特异性PCR 鉴别**Allele-specific diagnostic PCR authentication of *Dendrobium thyrsiflorum***

**Abstract:**

The aim of this study was to establish a diagnostic PCR method for authentication of *D. thyrsiflorum* Rchb. f. Based on rDNA ITS sequences of the 164 samples from 109 *Dendrobium* species sequenced and quoted from GenBank, the allele-specific diagnostic primers QH-JB1 and QH-JB2 for authentication were designed. Using the primers, diagnostic PCR was performed with the total DNA of *D. thyrsiflorum* Rchb. f. and other *D.* species as templates to establish the positive PCR condition for *D. thyrsiflorum* Rchb. f. A DNA fragment about 300 bp was amplified from *D. thyrsiflorum* Rchb. f. with anneal temperature at 63.5 ℃ and anneal time at 1 min, whereas no other DNA fragment was amplified from the rest *D.* species. The allele-specific diagnostic PCR was proved to be a simple and quick identification technique, suitable for the authentication of both fresh and dried materials of *D. thyrsiflorum* Rchb. f.

**Keywords:** *Dendrobium* allele-specific diagnostic PCR authentication *Dendrobium thyrsiflorum*
