Pharmacokinetics in Drug Development: Clinical Study Design and Analysis, Volume 1

Publication Date: 2005-12-05

Edited by Peter Bonate and Danny Howard

Volume 1 discusses the role pharmacokinetics plays in selected clinical study designs. Included are first-time-in-man studies, biopharmaceutical, and special population studies. The chapters are written to provide the reader with a familiarity for scientific and operational considerations, and to provide insight into the authors' practical experiences conducting these studies. Volume 1 also discusses the application of pharmacokinetic analysis techniques to drug

development - from noncompartmental analysis and interspecies scaling to deconvolution and clinical trial simulation. Volume 1 closes with a discussion on the analysis of clinical safety data in pharmacokinetic studies. See also the [table of contents](#).

ISBN: 978-0-9711767-4-4

Suggested List Price:
\$179.25 (AAPS member)
\$239.00 (nonmember)
