中文摘要: 川芎为古今有名的川产大宗商品药材,其道地性极强,长期以来集中在都江堰金马河上游以西地区。近年来,学者对川芎的历史、品种和产地进行了诸多研究,但对其道地药材形成模式的系统梳理未有报道。作者从中药道地药材形成的一般规律出发,探寻川芎道地药材的形成模式,最终认为,川芎道地药材的形成模式为道地产区独特的生态环境与先进的栽培种植技术相结合的双重因素关联决定型。

Discussion on forming pattern of Dao-di Herbs *Ligusticum chuansiong*

Abstract: As a famous-region Dao-di Herbs, *Ligusticum chuansiong* which mainly grows in the west of the upper reaches of Jinma River in Dujiangyan for a long time. In recent years, the history, species and origin of *L. chuansiong* were researched by many scholars. However, the forming pattern of Dao-di herbs of *L. chuansiong* has not been reported systematically. Basing on the general principles of the formation of Dao-di herbs, it can be concluded that the forming pattern of *L. chuansiong* is the type of two determinants, which are combined both unique ecological environment of genuine regions and advanced cultivation techniques.
