Evaluation point of rational drug use of traditional Chinese medicine in market

Abstract:Minimizing the underlying risk and maximizing the benefits of drug users, by using drugs under a safe, efficient and economical principle, is both the requirement and purpose of clinical rational drug use. This paper evaluates the clinical application of traditional Chinese medicine (TCM) in the market based on its characteristics, considering if the drugs are safely applied, if the medicine has an anticipated effect, and if the medicine is properly priced. This paper also brings the idea of establishing an evaluation system integrated with the characteristics of TCM to monitor the clinical application of TCM after going into the market and thus further optimizes the clinical instructions of applying TCM and helps to guide the appropriate usage of TCM.

keywords:traditional Chinese medicine(TCM) in the market rational drug use evaluation
