中文摘要:目的:建立炎可宁片中盐酸小檗碱、黄芩苷和汉黄芩素含量的HPLC测定方法。方法:采用Shim-pack VP-ODS(4.6 mm × 250 mm, 5 μm)色谱柱,流动相为甲醇-乙腈-0.1%磷酸溶液(三乙胺调pH 3.0),梯度洗脱,流速0.8 mL · min<sup>-1</sup>,检测波长265 nm。结果:盐酸小檗碱、黄芩苷和汉黄芩素的线性范围分别为3.838~115.1(r=0.999 8),15.51~465.2(r=1.000 0),7.005~210.1 mg · L<sup>-1</sup>(r=1.000 0),方法回收率均不低于98%。结论:方法简便、准确、重复性好,能排除其他成分的干扰,可用于该制剂的质量控制的评价。

## Determination of Berberine Hydrochloride, Baicalin and Wogonin in Yankening Pian by HPLC

**Abstract: Objective:** A HPLC method was established for the determination of berberine hydrochloride, baicalin and wogonin in Yankening Pian. **Method:** Shim-pack VP-ODS(4.6 mm × 250 mm, 5 μm) column was used with the mobile phase of methanol-acetonitrile-water, which was adjusted to pH 3.0 by 0.1% phosphoric acid solution and triethylamine by gradient elution. The flow rate was 0.8 mL · min<sup>-1</sup>. The detection wavelength was set at 265 nm. **Result:** The HPLC method showed a good linear relationship in the range of 3.838-115.1 mg · L<sup>-1</sup>(r=0.999 8) for berberine hydrochloride, 15.51-465.2 mg · L<sup>-1</sup>(r=1.000 0) for baicalin, 7.005-210.1 mg · L<sup>-1</sup>(r=1.000 0) for wogonin. Recoveries for the three components were all above 98%. **Conclusion:** The method is simple, accurate and repeatable, which can be used for the quality control of the tablets.
